DETAILED ACTION

Response to Arguments

1. Applicant's arguments have been fully considered and are persuasive. However, upon further consideration, a new ground(s) of rejection is made.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-21 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The disclosure includes equations on p. 13 and 15, which shows the determination of the pseudorange residual, but fails to show how to determine the time-of day (claims 1-19) or the position (claims 20-21) from that. Thus, one skilled in the art to which the invention pertains, or with which it is most nearly connected, would not be able to make and/or use the invention.

Allowable Subject Matter

3. Claim(s) 1-21 would be allowable if amended to overcome the rejection(s) under 35 U.S.C. 112, 1st paragraph, set forth in this Office action, without the addition of new matter.
